DETAILLED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Baliga (US patent 5,637,898).

With respect to claim 31, Baliga teaches a method of manufacturing a power MOSFET, comprising (see figs. 2A-2K and 3 and associated text):
epitaxially growing a drift layer 112 of a first conductivity type (n) on a first conductivity type semiconductor substrate 114 used as a drain layer, said drift layer being doped with impurities having a concentration distribution increasing up to or toward said substrate (see abstract);
forming a base layer 116 of a second conductivity type (p) on said drift layer;
forming a source region 118 of the first conductivity type (n) on said base layer;
forming a trench penetrating said source region and said base layer to reach at said drift layer; and
forming trenched gate structure including a gate insulating film 124 and a gate electrode 126, said gate insulating film having a thin portion facing said base layer and a thick portion facing said drift layer.
Baliga fails to teach that the base layer is formed by epitaxial growth.
However, the formation of semiconductor layers by epitaxial growth is well-known in the art.

**Allowable Subject Matter**

3. Claims 32 and 33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
